

DATA ANALYSIS ACADEMY:

SOFTWARE INSTALLATION INSTRUCTIONS

MySQL Installer.....	1
Visual Studio Code	3
Git & Git Bash	6
Python & Data Analysis Libraries	14
Jupyter Notebook, NumPy, Pandas, and Matplotlib	15
Power BI Desktop	16

MYSQL INSTALLER

DIRECT DOWNLOAD AND INSTALL INSTRUCTIONS:

1. Click “Download” to MySQL Installer directly from <https://dev.mysql.com/downloads/installer/>

MySQL Installer 8.0.40

Note: MySQL 8.0 is the final series with MySQL Installer. As of MySQL 8.1, use a MySQL product's MSI or Zip archive for installation. MySQL Server 8.1 and higher also bundle MySQL Configurator, a tool that helps configure MySQL Server.

Select Version:
8.0.40

Select Operating System:
Microsoft Windows

Windows (x86, 32-bit), MSI Installer (mysql-installer-web-community-8.0.40.0.msi)	8.0.40	2.1M	Download
Windows (x86, 32-bit), MSI Installer (mysql-installer-community-8.0.40.0.msi)	8.0.40	306.5M	Download

We suggest that you use the MD5 checksums and GnuPG signatures to verify the integrity of the packages you download.

2. On the download page, click “No thanks, just start my download”

MySQL Community Downloads

3. After it has downloaded, run the installer. Note that you will have to say “yes” to the prompt “Do you want this app to make changes to your device?”
4. In the install wizard, choose the setup type **Full**.

5. Check that **all** available products will be downloaded for installation, then click **Execute**. (At a minimum, you **must** install MySQL Server, MySQL Workbench, and Samples and Examples):

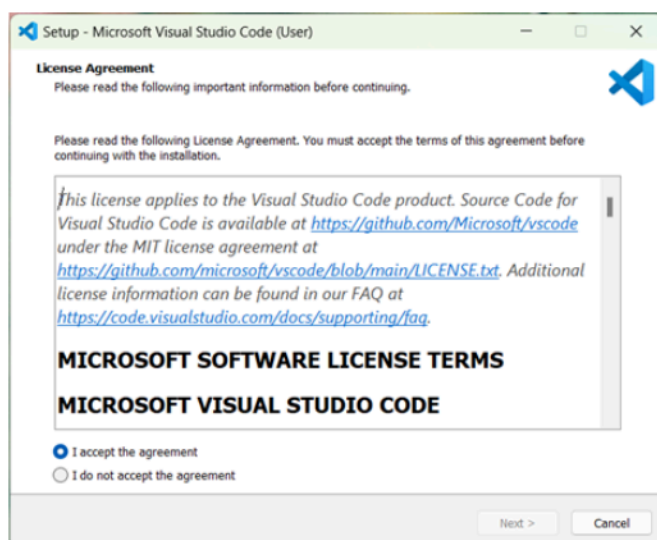

Product	Arch	Status	Progress	Not
 MySQL Server 8.0.46	X64	Ready to download		
 MySQL Workbench 8.0.47	X64	Ready to download		
 MySQL Shell 8.0.46	X64	Ready to download		
 MySQL Router 8.0.46	X64	Ready to download		
 MySQL Documentation 8.0.46	X86	Ready to download		
 Samples and Examples 8.0.46	X86	Ready to download		

6. Once downloading is complete, at the installation step click **Execute** again to install all products. (This step may take a few minutes!)
7. Follow the configuration steps, using the default settings. When prompted to create a password for the **root** directory, **be sure to write your password down somewhere safe where you will be able to find it again! You will need to remember this!**
8. Follow the remaining prompts to complete installation.

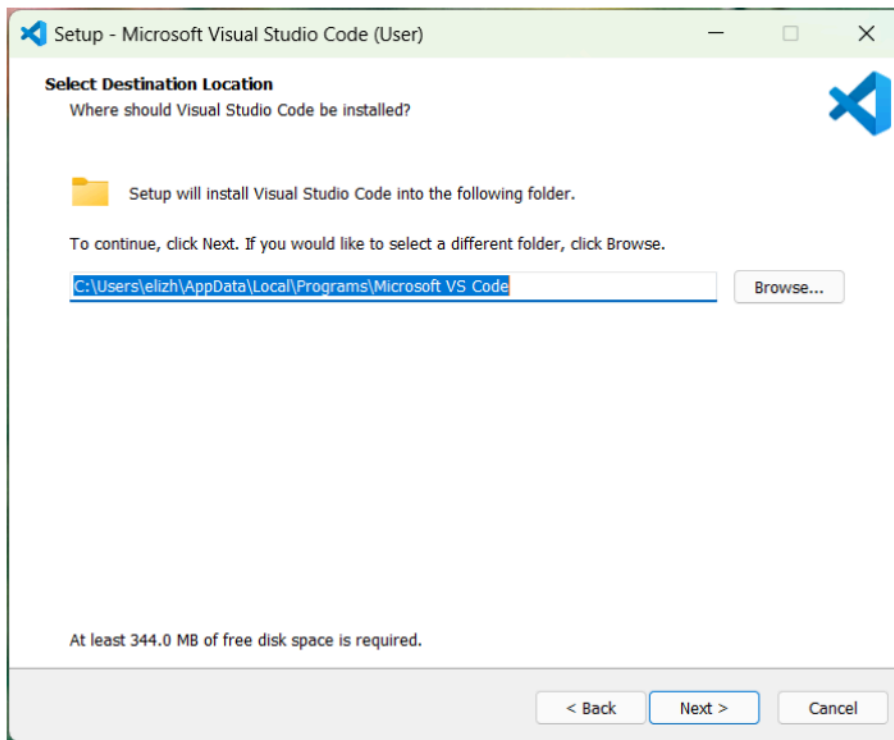

VISUAL STUDIO CODE

DIRECT DOWNLOAD AND INSTALL INSTRUCTIONS:

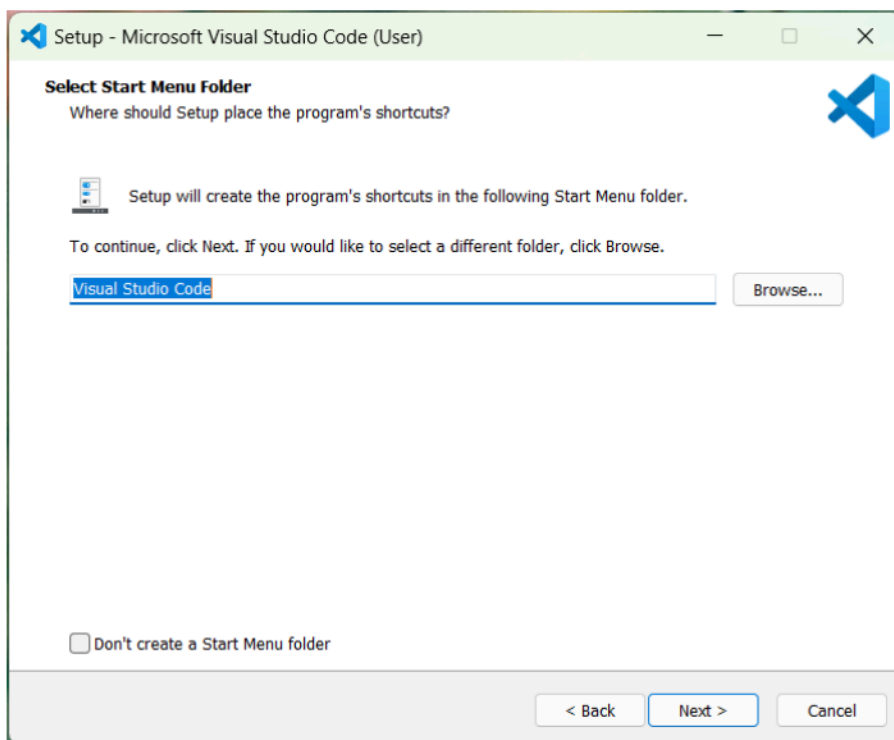

1. Download Visual Studio Code (free version) using the following link: <https://code.visualstudio.com/>
2. Launch setup for Microsoft Visual Studio Code. Choose "I accept the agreement" and click Next.

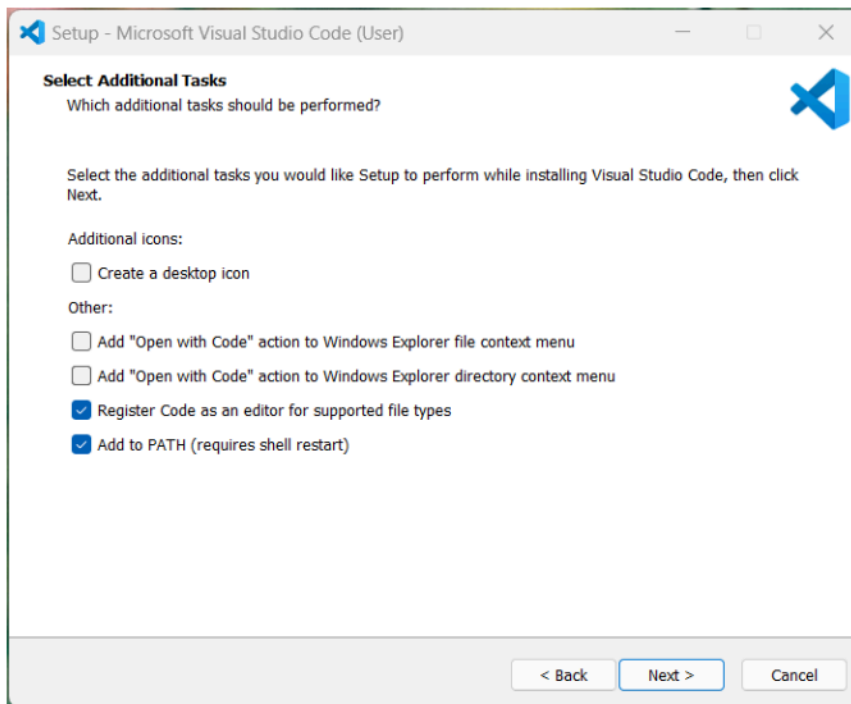

3. Review the install destination path and click Next.

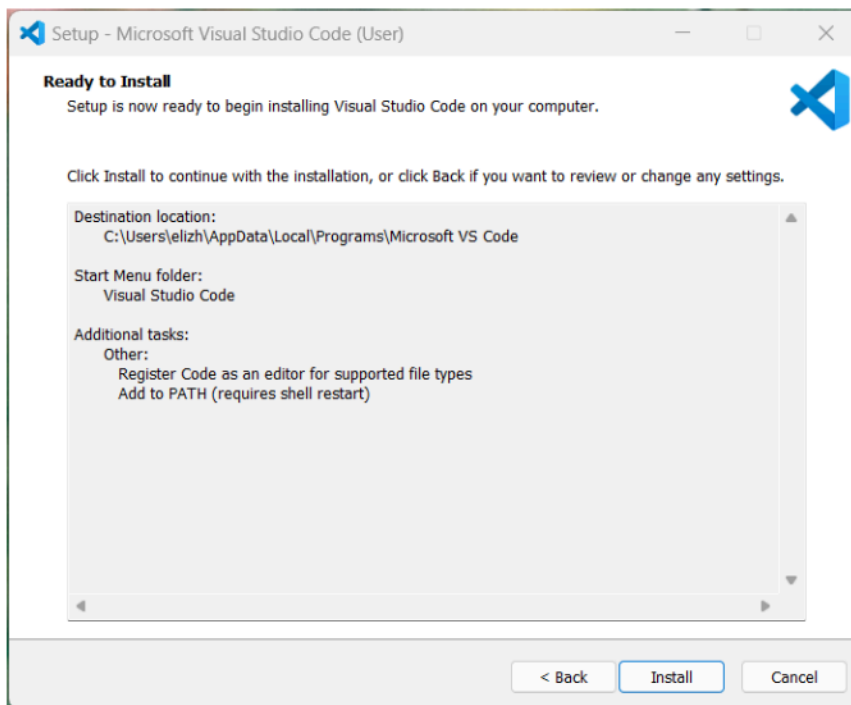

4. Review the intended Start Menu location and click Next.

5. Review additional installation tasks, and click Next.

6. Click Install.

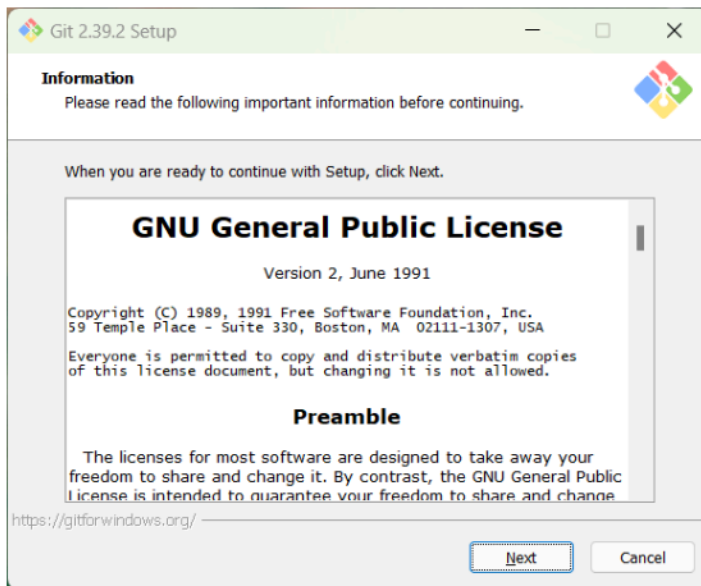

7. When install completes, click Finish to close.

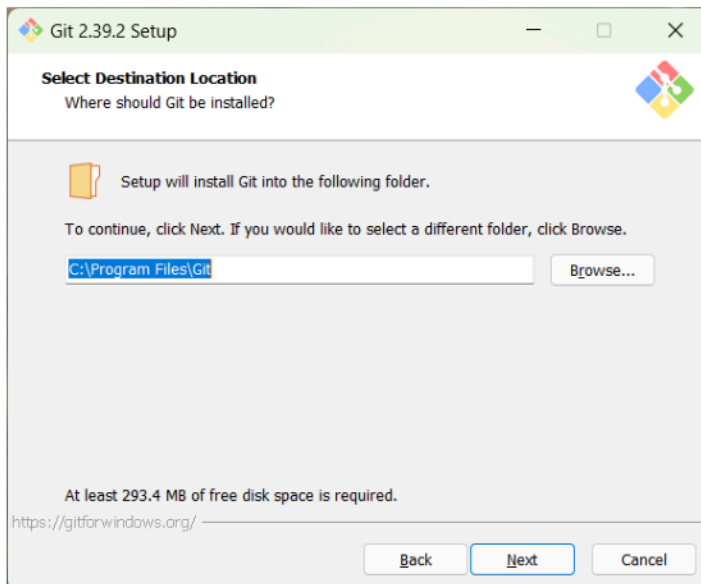

GIT & GIT BASH

DIRECT DOWNLOAD AND INSTALL INSTRUCTIONS:

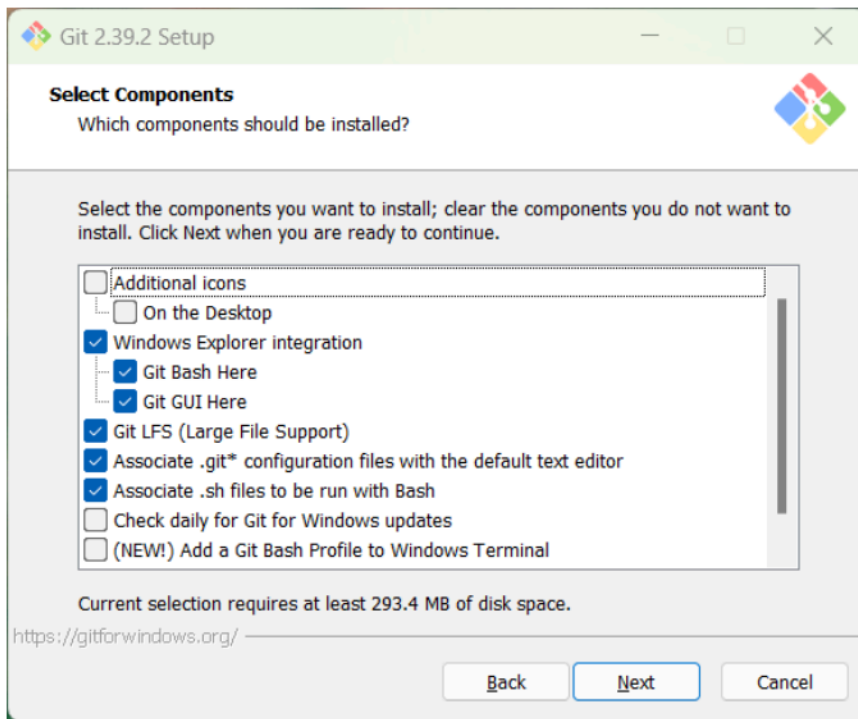

1. Git for Windows is available to download at the following link: <https://git-scm.com/download/win>
2. Open install file. Click “Yes” to allow app to make changes.
3. Review license information. Click Next.

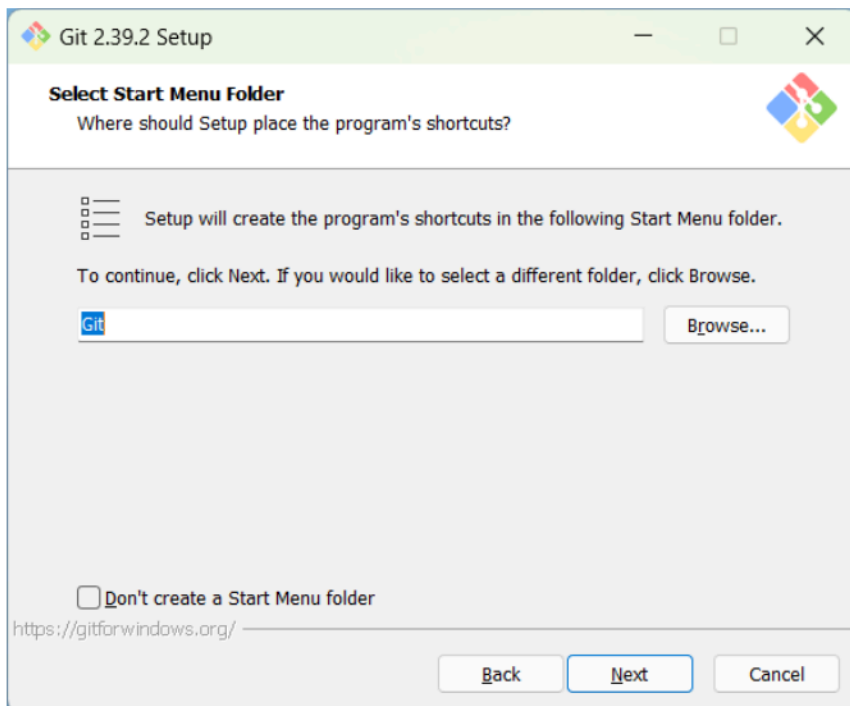

4. Review destination folder. Click Next.

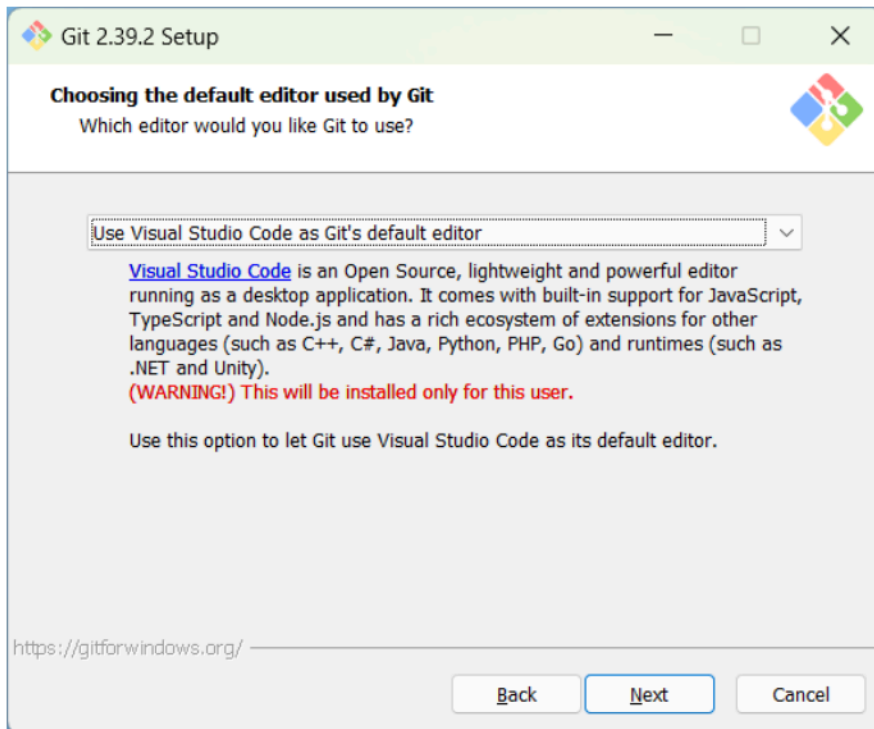

5. Review components to install. Click Next.

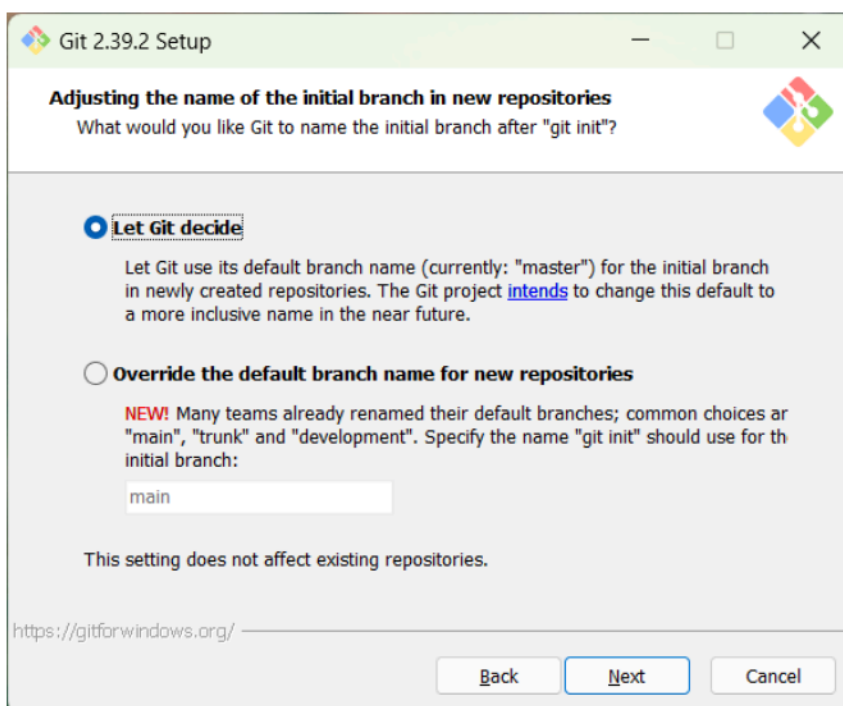

6. Review folder for Start menu. Click Next.

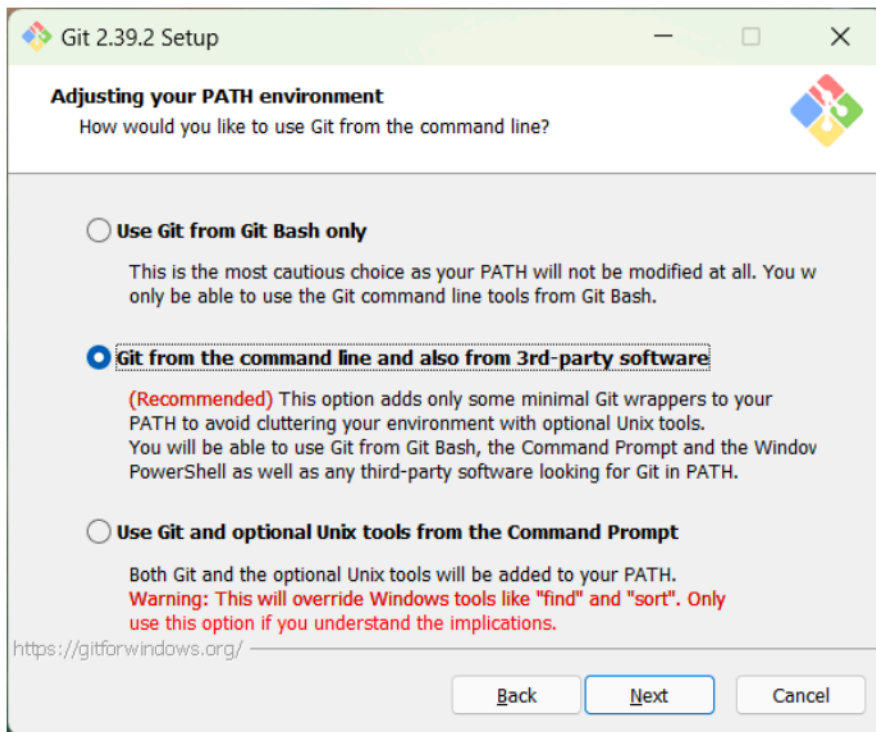

- At the step for choosing the default editor to be used, click the menu drop-down and select the option for "Use Visual Studio Code as Git's default editor." Then click Next.

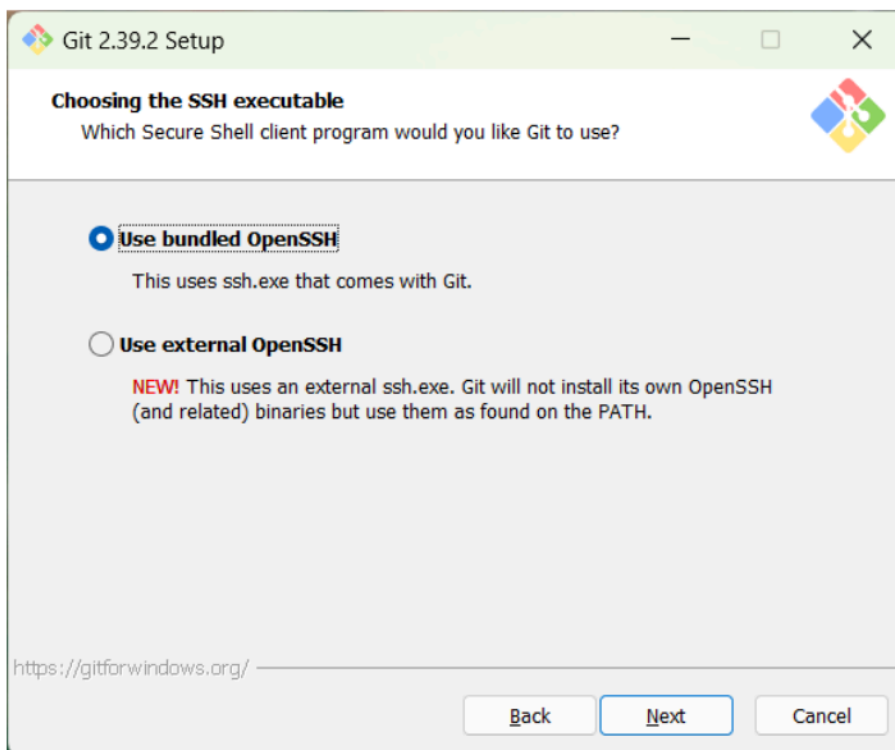

- For naming the initial branch when new repositories are created, it is recommended that you use the default "Let Git decide." Review and click Next.

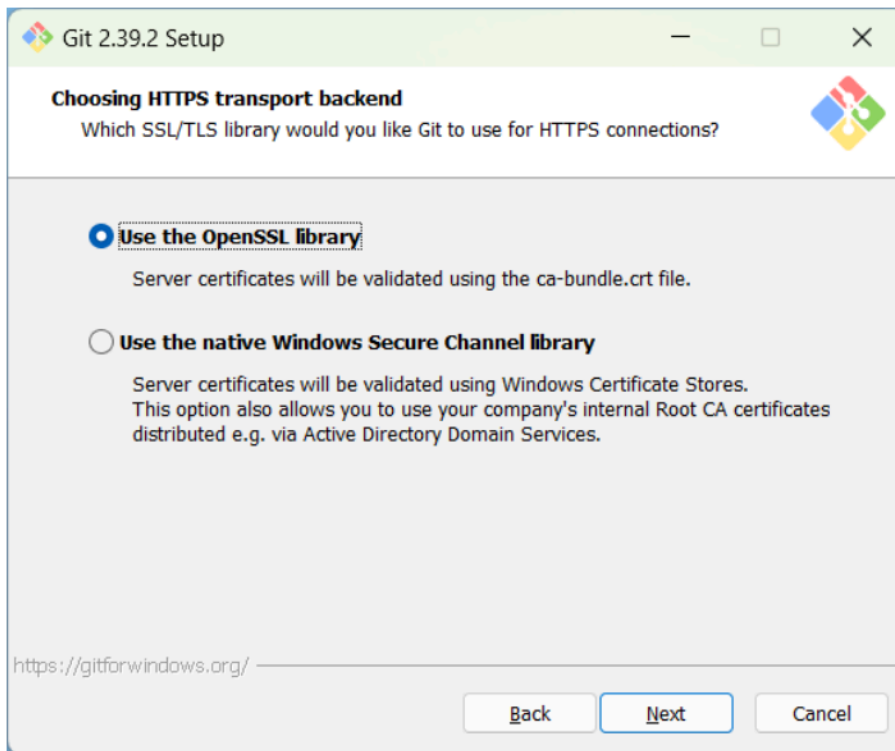

9. Leave the recommended option selected for how to use Git from the command line. Click Next.

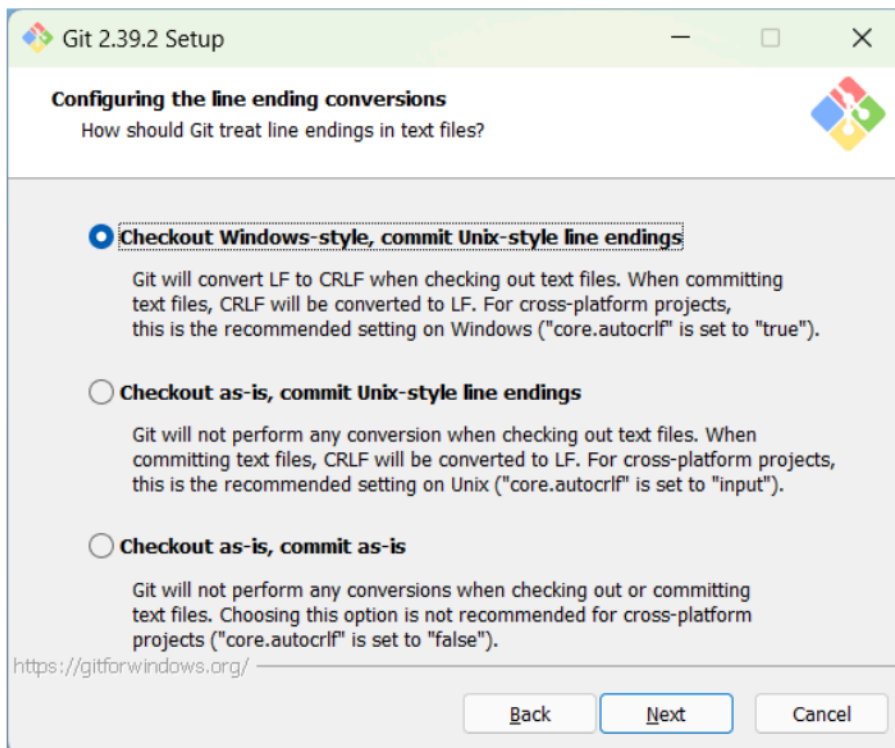

10. Review SSH executable options. Click Next.

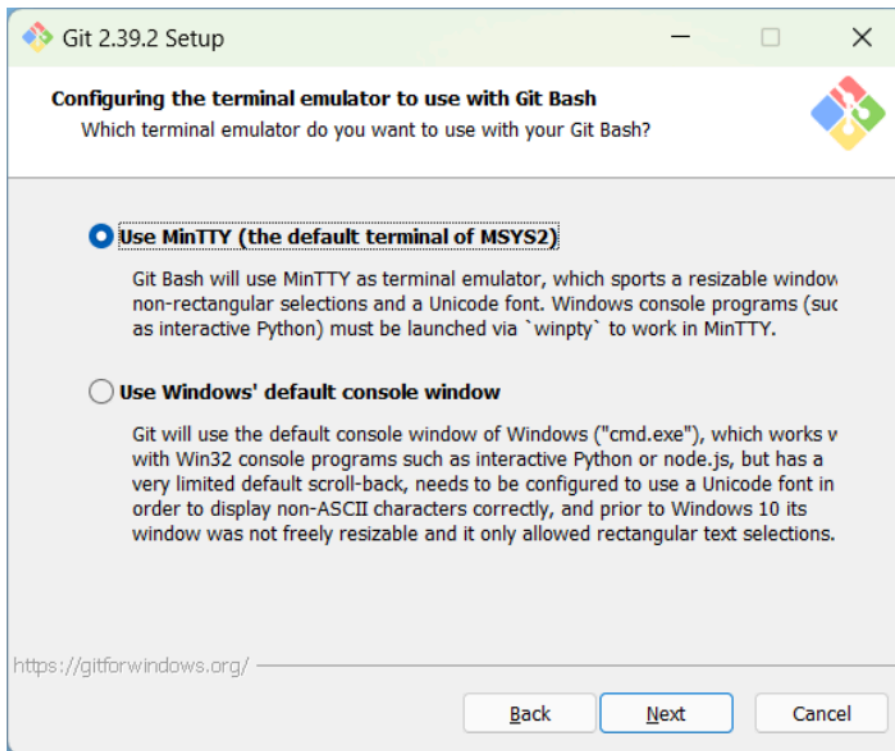

11. Review options for HTTPS connections. Click Next.

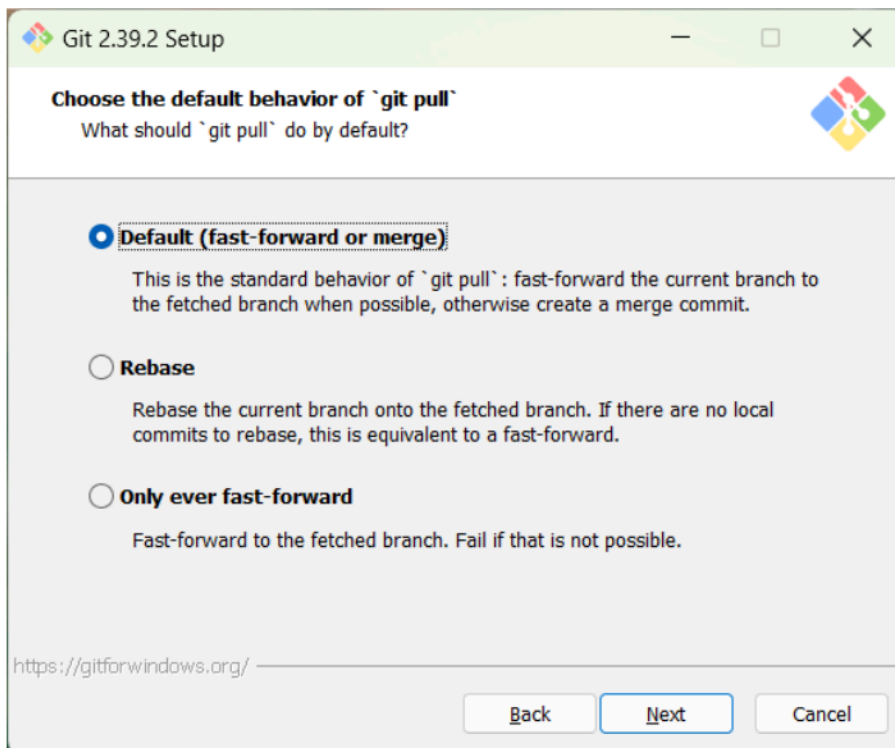

12. Review options for line endings. Click Next.

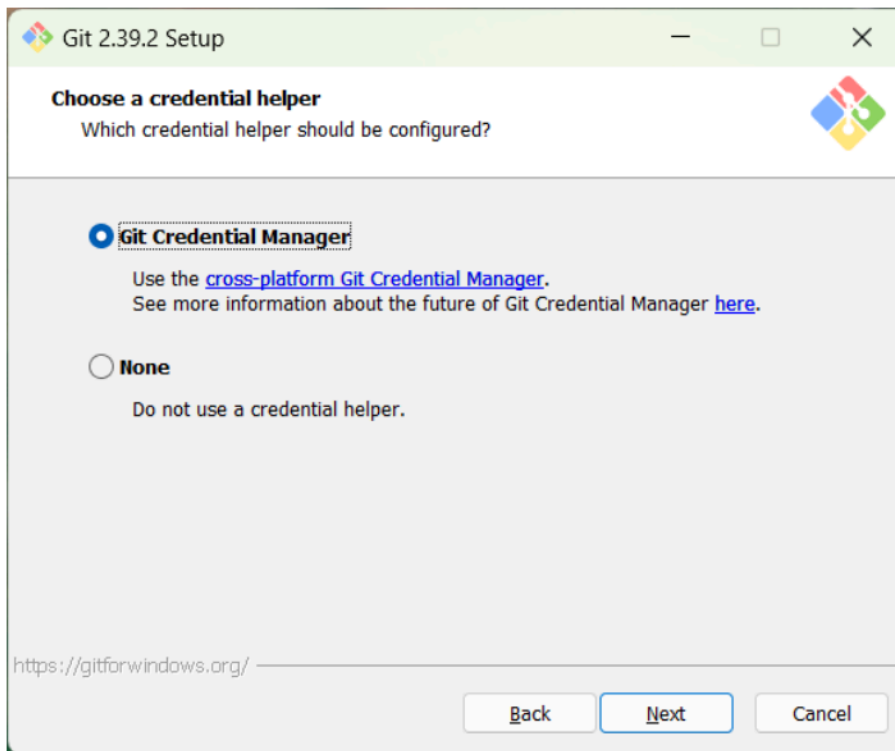

13. Review terminal emulator options. Click Next.

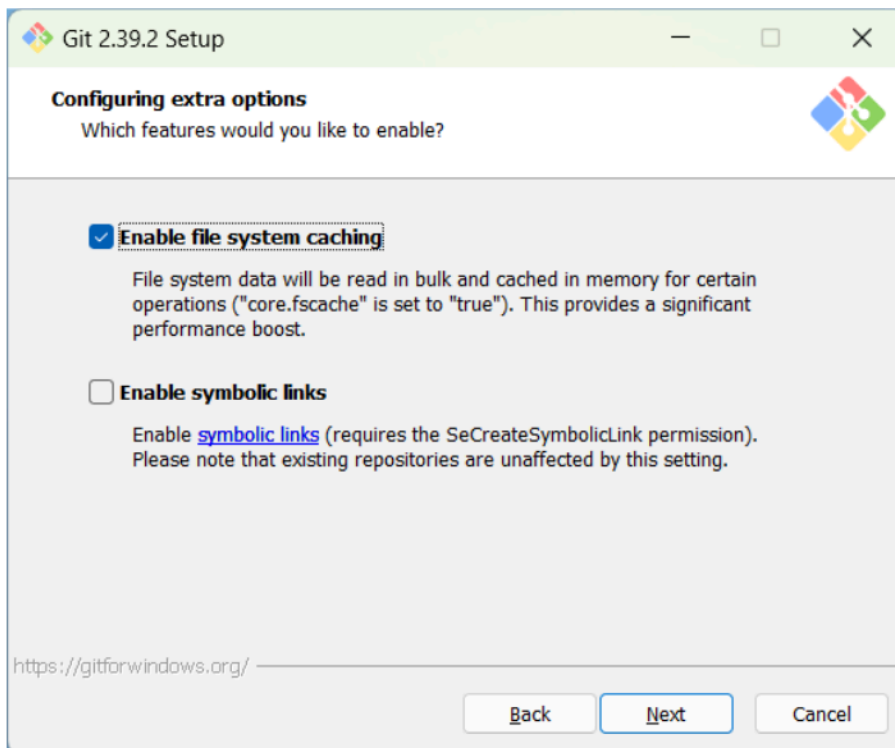

14. Review options for 'git pull' and click Next.

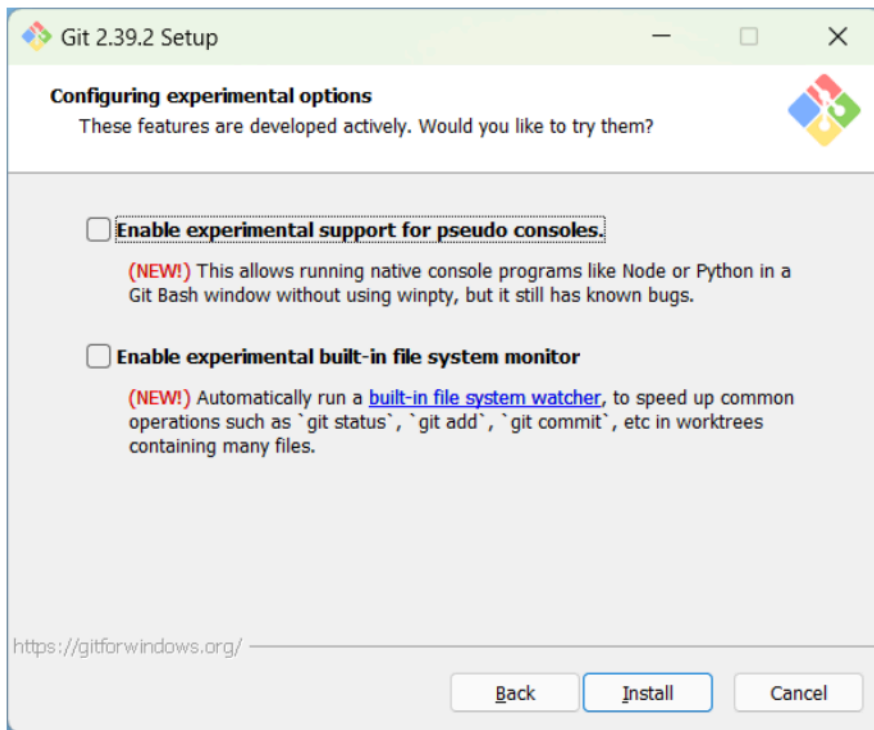

15. Review options for credential helper. Click Next.

16. Review additional feature options. Click Next.

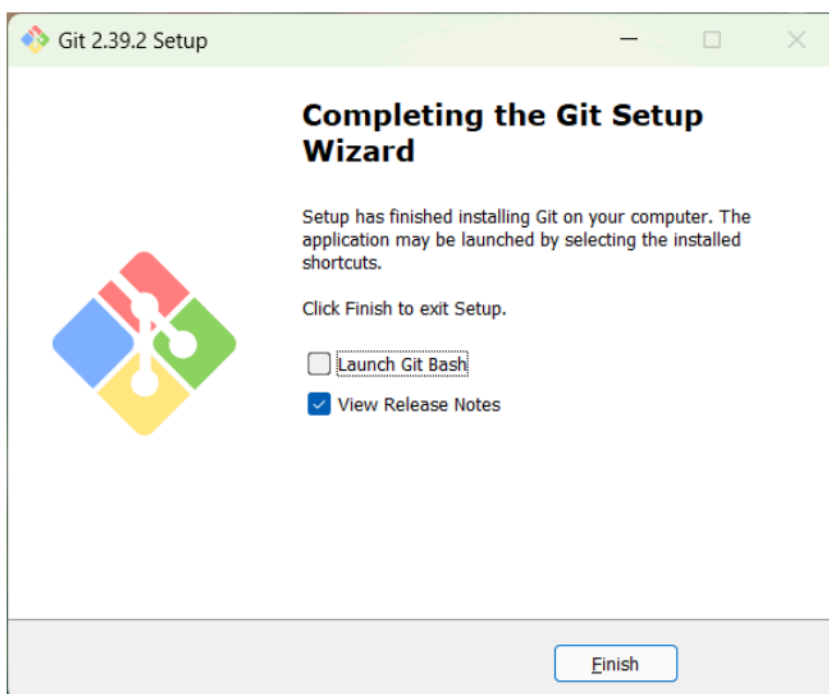

17. Leave experimental optional features unselected. Click Install.

18. Installation may take a few moments.

19. When setup is complete, click Finish.

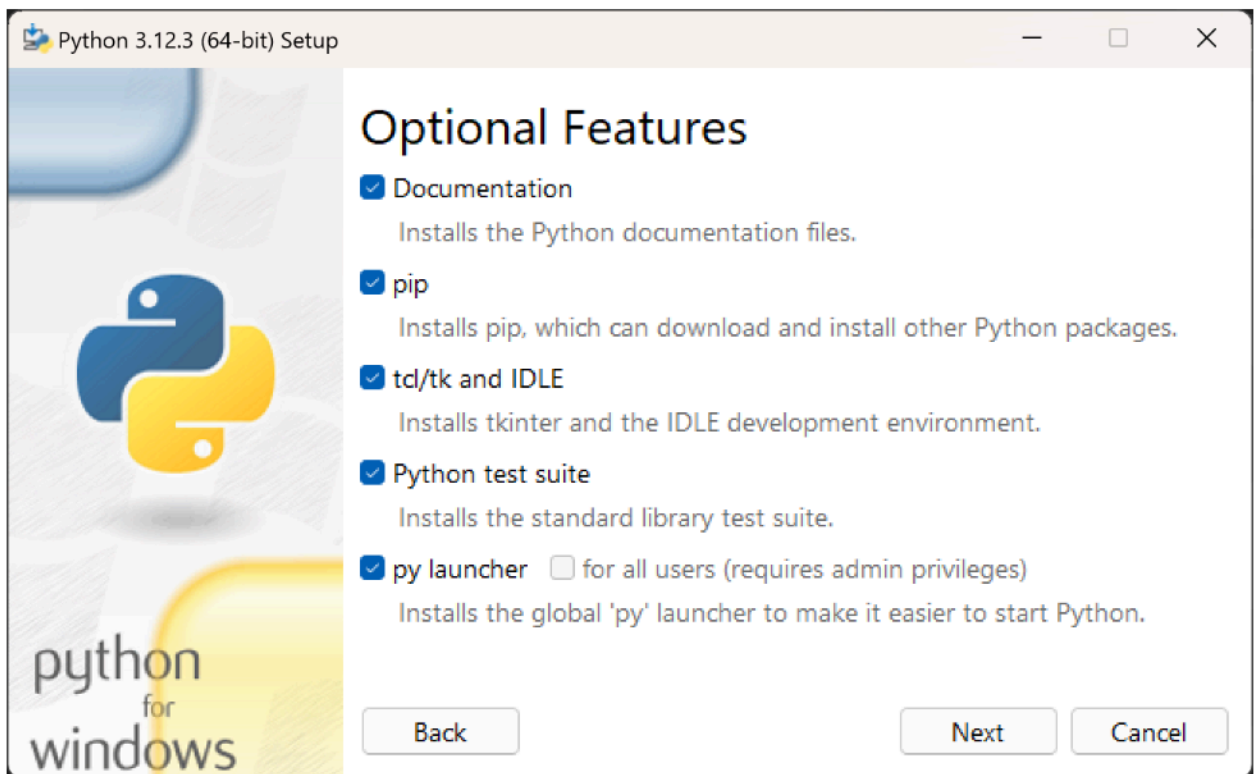

PYTHON & DATA ANALYSIS LIBRARIES

DIRECT DOWNLOAD AND INSTALL INSTRUCTIONS:

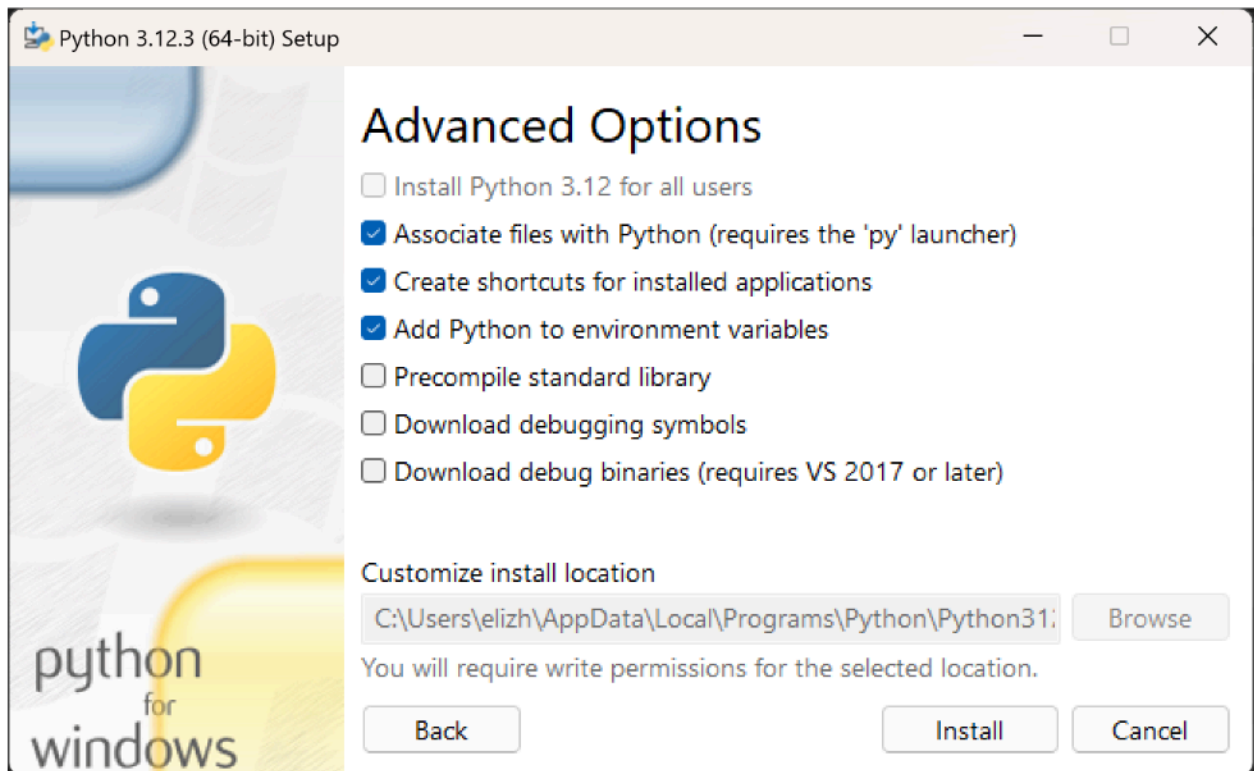

1. Download the current release version of Python from <https://www.python.org/downloads/>. The download button should look something like the screenshot below. (Do **NOT** download a prerelease version!)

2. Include all Optional Features on installation:

3. Include Advanced Options as follows:

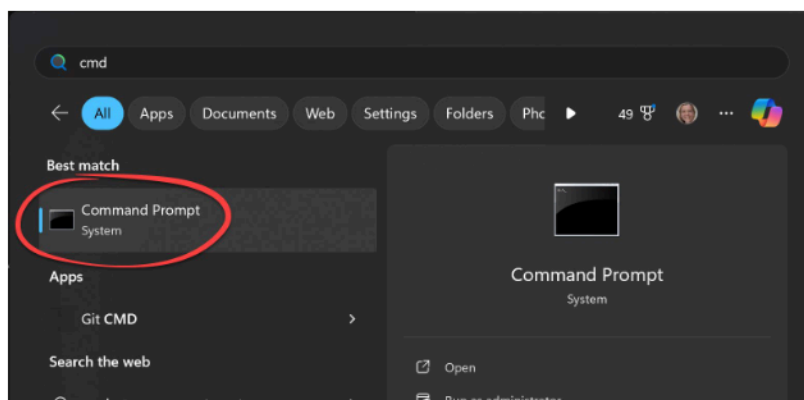

4. Install and finish.

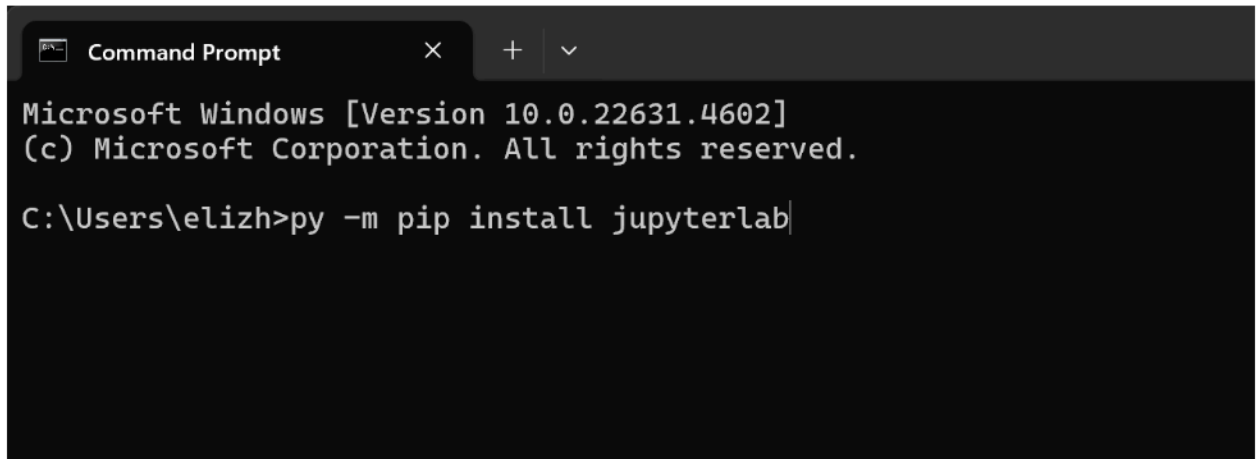

JUPYTER NOTEBOOK, NUMPY, PANDAS, AND MATPLOTLIB

INSTALLATION INSTRUCTIONS USING PIP:

1. After you have downloaded Python, you will be able to use the PIP installer from the command line. First open the Command Prompt by opening the Start menu, clicking in the Search box, and searching for **cmd**

2. To install Jupyter Notebook, in the Command Prompt enter the command `py -m pip install jupyterlab` then hit Enter.

```
Command Prompt
Microsoft Windows [Version 10.0.22631.4602]
(c) Microsoft Corporation. All rights reserved.

C:\Users\elizh>py -m pip install jupyterlab
```

3. Use the Command Prompt likewise to install the three major data analysis libraries, NumPy, pandas, and Matplotlib, using the following commands (one at a time!)

```
py -m pip install numpy
py -m pip install pandas
py -m pip install matplotlib
```

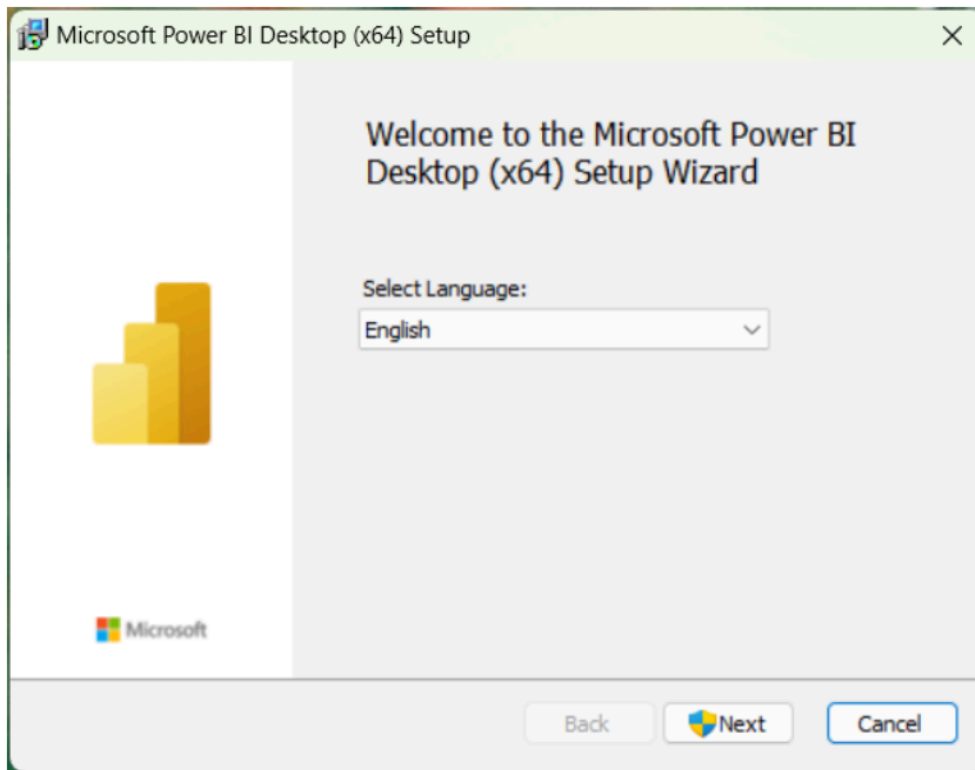

POWER BI DESKTOP

IMPORTANT: Ensure that you have the most current version of Power BI Desktop installed at the start of the course. If you have previously used Power BI, you may need to update your version, as Microsoft actively releases updates for this product. If you try to use an older version, you are likely to encounter file incompatibility issues with demo documents.

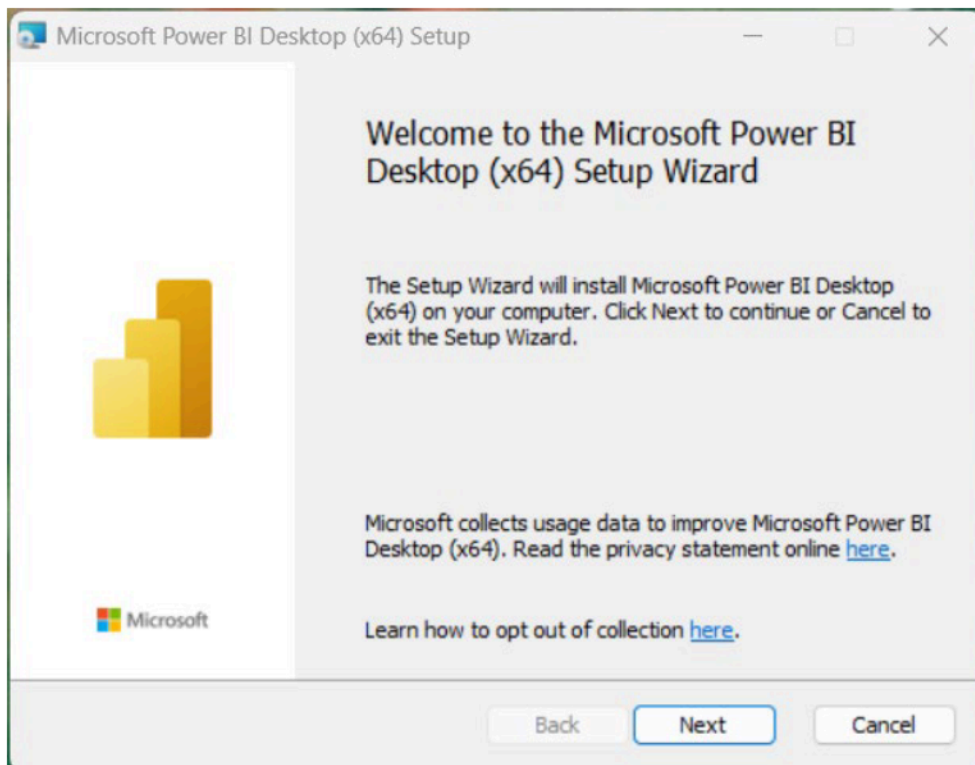

Note: You can also install Power BI Desktop via the Microsoft Store app. If you do so, then download and installation are completed based on default settings, with no install wizard walk-through. However, if you have a previously installed a version of the software and then install an updated version via the Microsoft Store app, you may need to manually uninstall the outdated version.

DIRECT DOWNLOAD AND INSTALL INSTRUCTIONS FOR POWER BI DESKTOP:

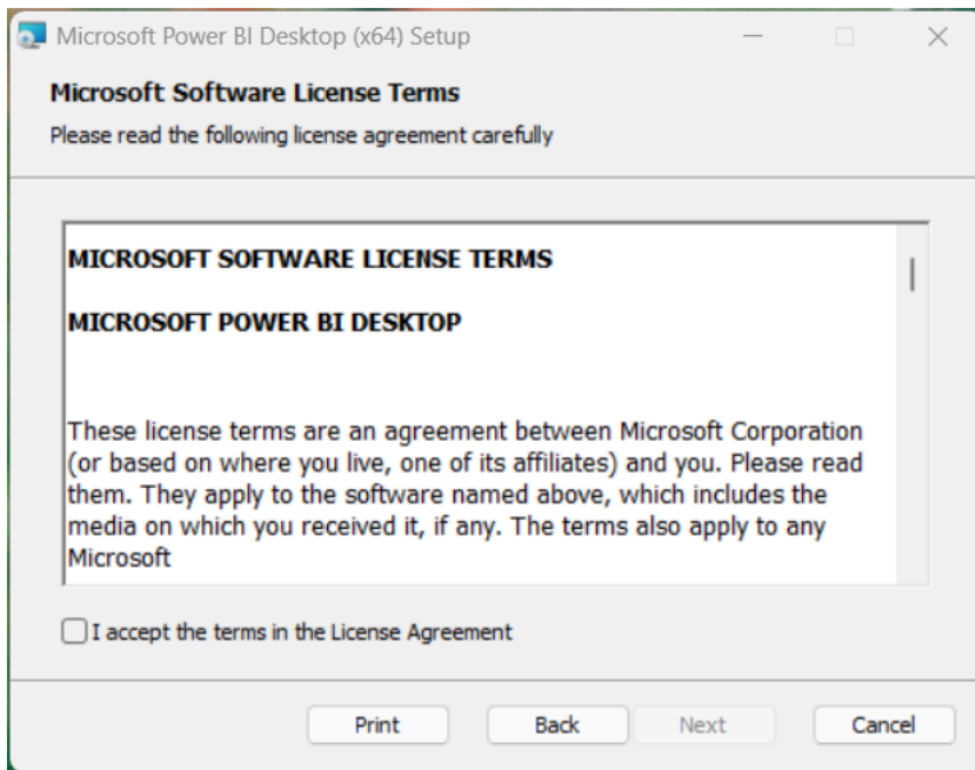

5. Power BI Desktop is available for download, free of charge, directly from Microsoft at the following URL:
<https://www.microsoft.com/en-us/download/details.aspx?id=58494>
6. Launch Power BI Desktop setup. Review language selection, and click Next.

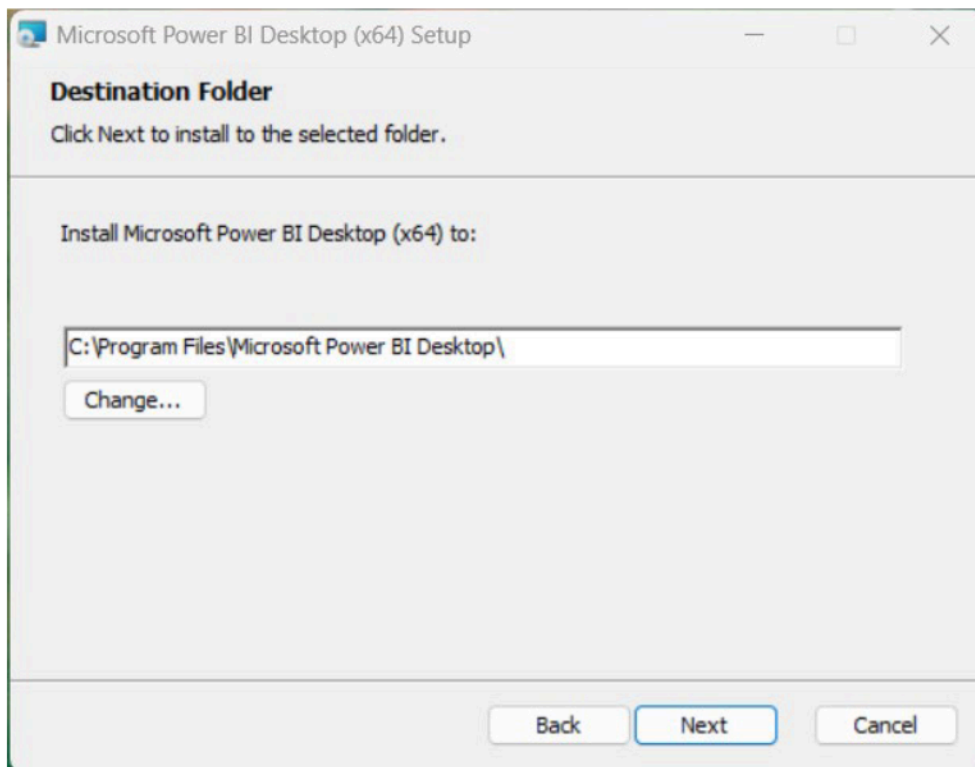

7. Click "Yes" to allow __ to make changes to your computer.
8. At "Welcome to the Microsoft Power BI Desktop Setup Wizard" message, click Next.

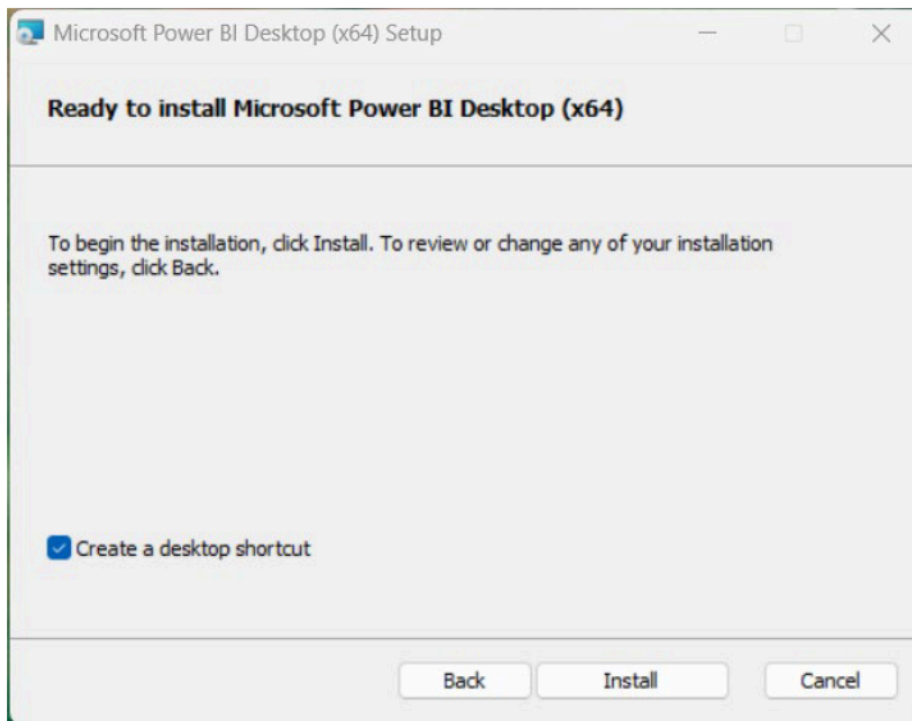

9. Check “I accept the terms in the License Agreement” and click Next.

10. Review the destination folder, and click Next.

11. Click Install.

12. Installation may take a few moments to complete.

13. When installation is completed, click Finish.
